REPLACING THE SWITCHES

The Pandora keyboard is upgraded to support Swappable Outemu switches. This means that switches are not soldered onto the PCB, and you can easily remove and replace switches.

This helps to increase the life span of the keyboard. If any of the switch stops working just use the included Keycap and Switch puller to remove the keycap and switch and replace the switch with a new one.

You can also change the switch colour to any Blue, Red, Brown or other Outemu Swappable Switches to customize the keyboard as you require without any hassle. Visit www.thecosmicbyte.com to buy switches for the keyboard.
