• System:	Windows 98/XP/2000/ME/Vista/Win7/ Win8/ Win10/Win11/MacOS etc.
• Switch:	Outemu Pre-Lubed Pluggable Switches
• Switch Life:	50 million
• Key number:	82keys US layout
• Keystroke:	2.0 ± 0.6mm
• Keycaps:	Double injection ABS keycaps
• Interface:	USB 2.0
• Cable:	USB to TYPE-C,1.8M Braided cable with Magnet Ring
• Current consumption:	＞300mA
• Scroll wheel for volume adjustment:	Clockwise is Vol+, counterclockwise is Vol-, press is mute

REPLACING THE SWITCHES

1 → **2** → **3** → **4**

The Phantom TKL keyboard is upgraded to support Swappable Outemu switches. This means that switches are not soldered onto the PCB, and you can easily remove and replace switches.

This helps to increase the life span of the keyboard. If any of the switch stops working just use the included Keycap and Switch puller to remove the keycap and switch and replace the switch with a new one.

You can also change the switch colour to any Blue, Red, Brown or other Outemu Swappable Switches to customize the keyboard as you require without any hassle.
