CONNECT USING 2.4G DONGLE

Step 1: Turn on the battery switch on the back side of the keyboard. Press FN + Q to enter 2.4Ghz Dongle Connection mode.

Step 2: Press and hold FN + P for 3 seconds to enter forced pairing mode, the P key

Note: Pairing needs to be done only once. Keyboard will automatically connect to dongle the next time.

CONNECT USING BLUETOOTH

Step 1: Turn on the battery switch on the back side of the keyboard. Press FN + W / E / R keys to switch between 3 Bluetooth devices, the corresponding key blue LED will flash at a frequency of 2/S. The keyboard will connect to a previously paired device within 15 seconds. If the connection is successful, the blue LED of the key will turn off. If the connection is unsuccessful, the keyboard will sleep and all LEDs will turn off.

Step 2: Press and hold FN + P for 3 seconds to enter pairing mode, the P key LED will blink in blue, after successful pairing, LED will stop blinking.

Note: Pairing needs to be done only once. Keyboard will automatically connect to the Bluetooth device the next time.

CONNECT USING CABLE

Press FN + T to enter wired connection mode.

BATTERY INDICATOR

To check the battery level, press FN + Left CTRL keys.

The left CTRL key will light up in different colours to indicate.

RED LED - LOW Battery Level

YELLOW LED - MEDIUM Battery Level

GREEN LED - HIGH Battery Level

Indicator works in battery power supply mode only.

When the keyboard battery is low, the battery indicator on the top-right of the keyboard flashes until the keyboard is connected to cable or is turned off. The battery indicator stays on while charging. When keyboard is fully charged, the battery indicator will turn off.

FAQ'S

support.thecosmicbyte.com

REPLACING THE SWITCHES

The Trinity keyboard supports Swappable Optical switches. This means that switches are not soldered onto the PCB, and you can easily remove and replace switches.

This helps to increase the life span of the keyboard. If any of the switch stops working just use the included Keycap and Switch puller to remove the keycap and switch and replace the switch with a new one.

You can also change the switch colour to any Blue, Red, Brown or other Optical Swappable Switches to customize the keyboard as you require without any hassle.
